

The Paddle Move

To perform this trick, you need to perform the paddle move. Here are the basics.

Start with the side of the paddle with the image you wish to show ostentatiously on both sides up and facing the spectator.

Note how the paddle is held and the position of the thumb and fingertips.

With the thumb push the stem of the paddle to make it turn over as if to reveal the other side of the paddle. Note how the thumb having pushed the paddle against the thumb is now extended slightly past the fingers.

To create the illusion, turn your hand over at the same time as you roll the paddle.

Reverse the moves and return to the starting position.
